Individuals with Disabilities Education Act – Part B Section 619
Preschool Program

PURPOSE

The Preschool Grants Program (also known as Section 619) is intended to help states ensure that all preschool-aged children (3-5 years of age) with disabilities receive special education and related services. In 1986, before this program existed, only half of the states provided services to preschoolers with disabilities. Since 1987, however, when this expanded program began operating, the number of children served has increased from 265,000 to an estimated 710,400 in fiscal year 2011.

WHO RECEIVES FUNDING

State education agencies (SEAs) receive this funding, and through them, local education agencies (LEAs) and educational service agencies are eligible for grants under this program.

ACTIVITIES SUPPORTED

Funds are used to provide the full range and variety of appropriate preschool special education and related services to children with disabilities 3 through 5 years of age.

FUNDING CONSIDERATIONS

Over the last two decades, the enrollment of preschool children with disabilities receiving services provided by IDEA has grown by over 420,000 or 60%, while federal funding has only increased by 25%, without taking into account inflation. Over the last decade alone, funding has decreased by over $15 million. In 1992, the federal government spent $803 dollars per child by 2010 it was only spending $527 dollars per child, a decrease of 34%. While ARRA infused a substantial and needed amount into this program, without a sustained commitment to funding, children will fail to receive appropriate services especially in these difficult economic times. Thus, the reality is that when federal funding fails to keep pace with program growth, children, families, schools and states bear a disproportionate share of the financial burden.

**Decreasing Commitment: Decline in IDEA Preschool Funding**
